

High-Powered, Versatile Handheld Welding Tool For In-Field or In-House Finishing

The EliteAIR is a versatile handheld welding tool for completing welds for hard to access seams on finished products. The EliteAIR can be used for air tight or water tight products, in-house repair work and in-the-field instant repairs of industrial fabrics.

- Ability to reach hard to access seams
- Finish in-house or in-the-field patches or repairs on multiple products
- Make your seams airtight and watertight
